Portugal

*The overall aim of the ERASMUS + project called Sustainable learner-centred teaching – Advanced Resources for Georgia and China is to **systematically engage higher education institutions in Georgia and China** in new teaching practices **applying learner-centred methods**.*

3 specific aims

► **Capacity building** in partner country institutions for implementing learner-centred teaching approach

► **Raise awareness** about learner-centred teaching in involved institutions and society

► **Establish bases** for cooperation through international network for experience exchange

Do you want to:

- *foster collaboration among students?*

- *improve your teaching skills?*

- *engage your students in more active participation in lessons?*

- *help them develop their meta-cognitive skills?*

Where

The 3-days training in learner-centred teaching methods is given by **Continuous Professional Development Units (CPD Units)**. Such units were established at **selected universities in Georgia and China** to provide professional training in the field of learner-centred teaching methods.

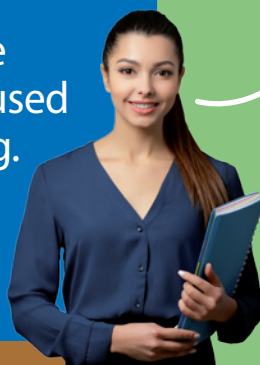

How

Learner-centred teaching methods include **active learning**, in which:

- ▶ Students debate, solve problems, engage in **cooperative learning**.
- ▶ Students work in teams on diverse projects which support **inductive teaching and learning**.
- ▶ Students are presented with challenges.

Carefully selected methods are given in the Manual of Learner-centred Teaching which is used as a **tool for the teacher** professional training.

Join the 3-days training and learn more about learner-centred teaching methods!

What

*Applying a learner-centred approach reflects a **shifting paradigm in education** where the spotlight has moved from teacher to students. This learner-centred orientation cultivates and **builds up student's responsibility** and active involvement in processes of learning. Learner-centred teaching methods improve student's participation, retention of knowledge, boost student's performance, **foster collaboration** and facilitate personalized learning.*

Outcome

Using learner-centred teaching methods in your courses will allow you to **make learning more fun**.

You will learn how to encourage students to reflect on their own learning, to **engage** them in the learning process and support **fruitful collaboration**.

+Online

Furthermore, via the online platform maintained by CPD Units you can **stay in touch with colleagues** using learner-centred teaching methods in their courses and **share your experiences worldwide!**
